

# Pull tester with motorized accuracy for wire-breaking measuring

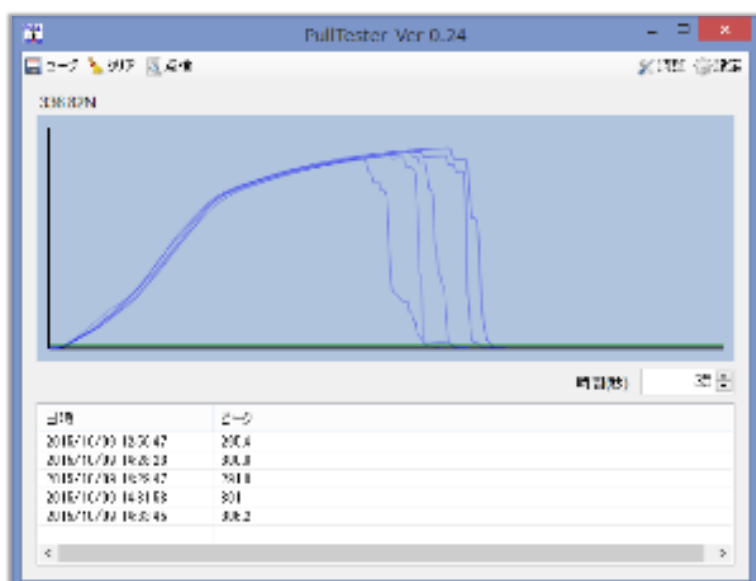

## Auto-Pull Tester APT- Series

- Compact and smart style fits to any factory space.
- One touch firm clamping of terminal and holding wire allows a constant speed pull until it reaches the wire breakage, which guarantees high accuracy.
- Box terminals, tab terminals, pin terminals, and other odd terminals can be clamped easily.
- Wire clamping is available from small( 0.13Sq) to large (5Sq)
- Force curve and data can be monitored by PC.

### Measurement software

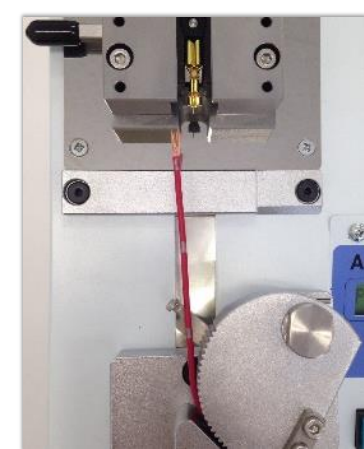

Pull force curves can be monitored with the PC software. Data are output in Excel format. The RS232C cable is optional.

### Automatic wire hold clammer

Wire set

Wire clamping starts as the clammer moves back.

Wire being set between the roller and the guide will be automatically held as the clammer moves backward. Wire length is minimum 80mm for clamping. 0.13sq to 5sq wires are available.
